MIND IT! — THE PLAYER'S GUIDE

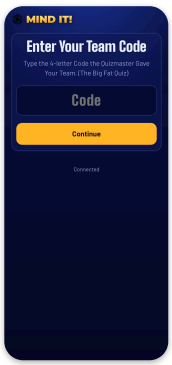

Everything you need to know before your first game

A · Welcome to Mind It!

Mind It! is a TV game-show quiz. Your team takes turns picking questions from a big board on the TV and **answers out loud**. Right answers win points, wrong answers lose them — and the team with the most points after **Mastermind It!** wins.

B · How to join (1 minute)

1. **Scan the QR code on the TV** ("Scan to Join Your Team", before the game) with your camera or Google Lens. It also appears when it's time to bet.
2. The **player page** opens in your browser — no app, no sign-up, no internet needed. Your phone just has to be on the **same Wi-Fi** as the quiz laptop (turn mobile data off if it won't load).
3. **Type your team code** — 4 letters the Quizmaster gives your team — and tap **Continue**.
4. Check it shows **your team's name** and score (a one-player team is called by the player's name). Wrong team? Tap **Change Team Code**.
5. It says **Eyes On the TV**. You're in — wait for the game to begin!

Type your code

You're in

C · How the game works

- **Teams take turns.** The TV shows **Now Playing** and who's **Next**.
- **Choose a question:** on your turn, say a category and a value ("Pub Grub for 200!"). Bigger numbers = harder questions.
- **Answer out loud.** One answer from your team. The Quizmaster decides if it's right.
- **Watch the timer:** 45 seconds per question (a heartbeat plays in the last 10).
- **Use strategy:** wrong answers cost points — passing is free.
- **Compete across rounds:** each round is worth more. Hidden **Blind It! questions** and special **chips** can change everything.
- **Finish with Mastermind It!:** one question, one secret bet.

D · Basic scoring

What happens	Points	Example (200 question)
Right answer	+ the value	+200
Wrong answer	– the value	–200
Pass	0	0
Quick! Right within 10 s on *your own* pick	+ speed bonus	+200 + 100 = **+300**
Right after other teams passed	+25% per pass	2 passes: +200 + 100 = **+300**

Round 1 questions are 200–1,000; later rounds are worth more. Scores **can go below zero**.

E · Passing

- Say **"Pass"** — you lose nothing.
- The **same question** goes to the next team, with 30 seconds plus whatever time was left (never more than 45).
- If you answer **wrong**, you lose the points and the question also goes to the next team (they get a fresh 45 s).
- The team that finally gets it right earns a **pass-on bonus**: +25% for every team that *passed* (wrong answers don't add a bonus).
- The next turn always goes to the team after the one who **picked** — not whoever answered.
- You **can't pass** a Blind It! question or a Triple Gamble.

SPECIAL POWERS & WINNING

Chips, bets, Mastermind It! — and five tips to win

A · Special abilities (the Quizmaster decides which are switched on tonight)

💰 Blind It! Hidden behind a tile. Find it and **only your team** answers. Bet on your phone: at least the question's value, up to your score (or up to 1,000 if your score is lower). Right = + your bet, wrong = – your bet. No passing. *Some nights it's 🤠 **Rewind It!** instead: the Quizmaster spins a wheel for 1×–5× the value; wrong loses at most 3×; no chips that night.*

🎲 Triple Gamble Once per game. On your turn, **before you pick**, tap **Use** → **Confirm Triple Gamble**. Your next question is worth **3×** (6× on a Blind It! question) — right or wrong! No passing. Example: 400 → +1,200 or –1,200.

🔥 Phoenix From Round 2, the team in **last place**, more than 2,000 behind, may get this chip (it's shown on the TV). Use it before picking: right = **double points + 20% of the gap** to the leader (enough to draw level with the leader); wrong = **lose nothing**. Once per game; it expires at the end of the round.

🍺 Bottoms Up Round 1 only, once per game. Before picking, tap **Use** and choose your **designated player**. If you answer wrong and that player **finishes their drink**, you lose nothing! Right answers score as normal. Any drink — no pressure.

Only one chip per question · chips don't work in Mastermind It! · in Buzzer Mode there are no chips.

B · Using your phone

- **Wagers:** when you bet, the phone wakes up with a keypad. Type your amount (or tap a quick button: **All in**, **Half**, **Minimum** / **Nothing**), then **Lock in**. Nobody else sees it — not even the TV.
- **Chips: Use** buttons under *Your Chips* — only on your turn, before picking.
- 📳 Android phones vibrate on your turn and when your bet opens.
- **Confirmations:** look for **Wager Submitted** ✓, **Triple Gamble Active**, **Answer Locked** 🔒.
- **Buzzer Mode** (if the Quizmaster turns it on): wait for the light, then hit **BUZZ IN**. Too early = locked out for ½ second. First buzz to reach the laptop wins.
- **Reconnecting:** phone locked or page closed? Just open it again — your code is remembered.

C · Mastermind It!

1. The TV shows the **category**. Teams with **0 or more** points play.
2. Bet any amount from **0** to your score on your phone (**All in / Half / Nothing**) and **Lock in**.
3. The question appears — **45 seconds**.
4. **Type your answer** on the same phone → **Submit Answer** before time's up.
5. The Quizmaster reveals teams one by one, lowest score first. Right = + bet, wrong = – bet.
6. Most points wins! 🏆 (Level on points? **Most right answers wins.**) Last place? That's 😼 **The Rascala!** — "Enna Rascala....Mind It!"

D · Five tips to win

1. **Pass when unsure.** A pass costs 0; a wrong 1,000 costs 1,000.
2. **Answer fast on your own pick** — the speed bonus adds half the round's lowest value.
3. **Save your Triple Gamble** for a category you own — and dream of a Blind It! question (6×!).
4. **Stay above zero** before Mastermind It!, or you can't play it.
5. **Bet smart in Mastermind It!:** leading? Bet so you still win if wrong. Behind? Bet big.

E · Common questions

Do I need an app?
No — just the browser.

Do I need internet?
No — only the quiz Wi-Fi.

Can I change my wager?
Not after Lock in. Ask the Quizmaster — only they can change it.

What if we answer wrong?
You lose the question's points; the next team gets a go.

Can we pass?
Yes, for free — except on a Blind It! question or Triple Gamble.

Phone disconnected?
Reopen the page; your code is remembered. The Quizmaster can enter bets for you.

Can our score go negative?
Yes — but below 0 you sit out Mastermind It!

When can we use a chip?
On your turn, before you pick.
